NOTES TO THE FINANCIAL STATEMENTS
(Unaudited)
MARCH 31, 2007

1. BASIS OF PRESENTATION

The interim period financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements, except as noted below. Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. These interim period statements should be read together with the audited financial statements and the accompanying notes included in the Company's latest annual report. In the opinion of the Company, its unaudited interim financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

2. NATURE AND CONTINUANCE OF OPERATIONS

The Company was incorporated in British Columbia on August 19, 2004. To date, the Company has not generated significant revenues from operations and is considered to be in the exploration stage.

The Company completed an Initial Public Offering ("IPO") on June 2, 2005 and its common shares commenced trading on the TSX Venture Exchange ("TSX-V") on June 30, 2005.

The Company is in the process of exploring and developing its mineral properties and has not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for mineral properties and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

Title to resource properties involves certain inherent risks due to the difficulties of determining the validity of certain mineral property interests as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its resource property interests and, to the best of its knowledge, title to all of its resource property interests are in good standing.

Lombok and Sumbawa Properties, Indonesia

The Company entered into an agreement with Sunda Mining Corporation (“Sunda”) pursuant to which Sunda assigned its option to acquire certain rights on the Lombok property (“Lombok”) and the Sumbawa property (“Sumbawa”)(collectively the “Properties”) to the Company, which Sunda had obtained from Indotan Inc. (“Indotan”). In consideration for the assignment, the Company paid \$81,572 and issued 11,500,000 common shares valued at \$862,500 to Sunda. Effective February 25, 2005, the Company and Indotan entered into a settlement agreement with respect to certain outstanding matters related to the Properties. Pursuant to this settlement, the Company and Indotan entered into an amended and restated option agreement (the “Option Agreement”) which sets out all of the rights and responsibilities of the Company and Indotan with respect to the Properties.

4. RESOURCE PROPERTIES (cont'd...)

Lombok and Sumbawa Properties, Indonesia (cont'd...)

Pursuant to the Option Agreement, the Company has the option, directly with Indotan, to acquire all of its rights to the Properties in consideration for which the Company issued 1,000,000 common shares, valued at \$125,000, and paid \$180,000. The Company now has an option, until February, 2010 to acquire 50% of Indotan's 1% net smelter returns royalty ("NSR") on the Properties in consideration for the payment of \$500,000. Concurrently with the signing of the Option Agreement, the Company received an option to acquire the remaining 50% of the 1% NSR, held by Indotan, on the Properties in consideration for \$60,000 (paid) and \$500,000, which can be paid prior to the expiry of the option in February, 2010. All of the holders of the NSR agreed that the NSR only applies to the Properties as at July 21, 2004 and not to any additional property interests which the Company acquires after that date. In accordance with the terms of the Option Agreement, the Company filed a listing application with the TSX-V and filed a prospectus for a public offering which has been completed.

In accordance with a limited power of attorney granted by Indotan pursuant to the Option Agreement, the Company caused Indotan to enter into two joint venture agreements (the "JV Agreements") with Indotan's Indonesian partner, PT Puri Permata Mega ("PTPM"), on the Properties. The Company has an initial 90% interest in the Lombok joint venture (the "Lombok JV") and the Sumbawa joint venture (the "Sumbawa JV"). At any time after a joint venture company is formed with respect to the Lombok JV and that company enters into a Contract of Work ("COW"), the Company can acquire a further 5% interest in the Lombok JV by providing funds to the Lombok JV in the amount of US\$700,000. At any time after a joint venture company is formed with respect to the Sumbawa JV and that company enters into a COW, the Company can acquire a further 5% interest in the Sumbawa JV by providing funds to the Sumbawa JV in the amount of US\$300,000. The Company has funded the respective amounts to each of the Lombok JV and Sumbawa JV.

Lombok and Sumbawa are currently comprised of two separate applications to the Indonesian Government for a COW to conduct mining activities and earn mineral rights to certain mineral tenements. Upon the approval in principle of the COW, preliminary general survey licenses ("SIPPs") were granted for the properties. The SIPP permits the Company to conduct preliminary general survey work over the COW application areas. The Sumbawa SIPP was granted on January 2, 2004 for an initial 12 month period. On April 19, 2005, an extension and expansion of the Sumbawa Property SIPP was granted until April 19, 2006 and on April 22, 2006, an extension was granted until April 22, 2007. Application for an additional 12 month extension is being processed. The Lombok SIPP was granted on December 4, 2002. On July 15, 2005, an extension and expansion of the Lombok Property SIPP was granted until February 15, 2006. A 12 month extension on the Lombok SIPP has been filed. The granting of a SIPP is not a guarantee that a COW will be entered into.

The Company entered into an agreement with PT Newmont Nusa Tenggara ("NNT") regarding a property ("*Block 1*") which is contiguous with the western boundary of the Company's current Lombok Island SIPP license. The acquisition was completed through a relinquishment by NNT of *Block 1* area. The terms of the agreement include granting NNT a 2% net smelter return ("NSR") on any mineral production from the area covered by *Block 1* together with a right of first refusal should the Company wish to introduce a new partner into any development within the area originally covered by *Block 1*.
